pewag austria GmbH Statement

pewag austria GmbH confirms that their Masterlinks Grade 100 AWS 26 acc. pewag drawing 21591-1 are suitable for a lift of 7.000kg when used with a II-leg chain assembly in the manner shown below – under precondition that the angle between the two legs is between 120° and 140°. If the Masterlinks are in vertical position (not as shown below) then the applicable WLL is 10.000kg at 90° and 7.000kg at 120°. Take care that the Masterlinks do not change from shown position to vertical position when loaded (Shock loading).

≈ 120°
