

## THE ADVANTAGES OF THE SEB

Metric threads: M8 → M48
UNC threads: UNC 3/8"-16 → UNC 1" 1/2-6
Safety factor: 5 and 4
Machinery Directive 2006/42/CE
Norm EN 1677-1
Individual traceability number
Operating temperature: -20°C → + 200°C
Swiveling under load (360° rotation)
Available in female and stainless steel version

### Your technical and quality advantages

<b>Usable for any kind of lifting operation (straight lifts, with angle, turning, rotating)</b>	→ absolute safety for any kind of lifting situation, no risk of wrong use
<b>Automatic orientation in the direction of pulling</b>	→ no need to manually orientate the lifting ring
<b>Solid rotation bushing</b>	→ no friction between shackle and object to be lifted, easy rotation under load
<b>Verification of each thread with calibrated gauge</b>	→ no costs related to non-conformity, lifting rings can directly be put in use
<b>Clear markings (CE, WLL, tightening torque)</b>	→ reduction risk of incorrect use
<b>Individual packaging and documents, delivery in sturdy packaging</b>	→ quality and easy handling
<b>Anti-tribocorrosion grease for life</b>	→ easy rotation under load, built-in corrosion protection
<b>Anti-corrosion coating (zinc coating) on bolt and base</b>	→ limiting risk of corrosion in critical environments, durability of products

YOUR  
OPTIONS

<b>Centering system</b>	→ possibility to increase WLL at 90°
<b>ALITRACER</b>	→ effective follow-up (inspections, stock management ...)

### Your service advantages

<b>Short delivery times for standard products and specials guaranteed</b>	→ no production breakdowns, operational gains, stock reduction
<b>No minimum order quantity</b>	→ stock reduction, quick fixes
<b>Multilingual sales team</b>	→ ease of communication, professional support
<b>Fast on custom-made solution (case study and testing)</b>	→ solution for special lifting applications
<b>Experience of over 40 years</b>	→ pledge of seriousness and professionalism
<b>Free annual inspection at our factory</b>	→ maintaining high safety level as annual check is conducted by the manufacturer
<b>ISO and UNC as standard threads, special thread (optional)</b>	→ one partner for your needs of swivel lifting rings
<b>High quality material and marketing supports</b>	→ videos, samples, technical drawings ...
